

September 2012

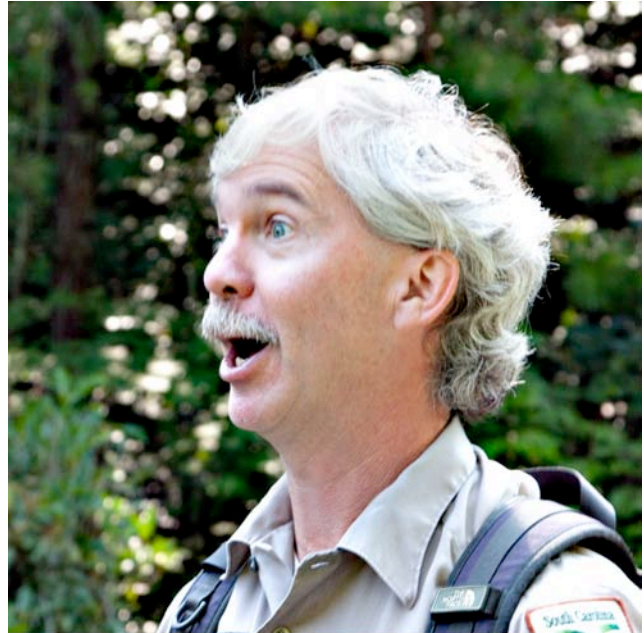

Hello Fellow SCANers,

Phil Harpootlian put together another great outing. This time we enjoyed the White Tract of the Jones Gap State Park. We were joined by park naturalist Tim Lee who gave us an overview and answered our questions along the way. Also joining us were members of the Western NC Botanical Society. We were a large group of 35 but we easily spread out and our size didn't seem to matter on the old logging road. In fact with a group this size there will be an expert for everything. We may even get a member or two.

An unexpected pleasure was the presence of Chris Manuse who is back in town after seeking opportunities in upstate NY. Chris credits SCAN with his knowledge of the natural world.

Deborah and Jerry Long were also a welcomed sight after missing many months with SCAN.

Attending were: Joy Charlebois, Judy Roloff, Susan Sunflower, Dana Herrman, Rex Segukca, Kat Beddingfield, Lyle & Sarah Campbell, Lynn Smith, Tom Jones, Mary Douglas, Chris Manuse, Bob & Marsha Hamlin, Deborah and Gerald Long, Jack Burke, Lauren Deavers, Wayne Grooms, Quentin Webber, Pat & Jerry Bright, Eva & Sam Pratt, Jan Cieglar, Kate Hartley, Jim Boylston, Tim Lee, Phil Harpootlian, Janie Marlow, Rita Zollinger, Greg Ross, Charlie and Lydia Williams. These names were taken from the sign-up sheet so I may have missed some of the spelling.

Tim is surprised to see everyone

Greg Ross captured a Timber Rattlesnake (*Crotalus horridus*). I borrowed the image from his Facebook page. After the photo op Greg replaced the snake to its ambush location where it remained for all to view and photograph.

We also enjoyed the Stalked puffball-in-aspic (*Calostoma cinnabarina*). It was poked by so many that I feared I would not get a photo but it kept coming back.

The attached list is partial. Jan awaits the list that Tom Jones and Eva Pratt are compiling. Stay tuned for the addendum.

Caroline Eastman will head-up our next adventure. Bring chairs if you wish to hawk watch. - Jerry

Stalked puffball-in-aspic (*Calostoma cinnabarina*)

Congaree Bluffs Heritage Preserve  
Calhoun County, Latitude: 33.749 Longitude: -80.705  
September 22, 2012

We will revisit Congaree Bluffs Heritage Preserve this month. We were last there a decade ago – on October 26, 2002. A copy of our species list is included with the newsletter mailing, so you can be prepared to look for changes in the area. Meet at the Education Building at 10:30. Bring the usual stuff.

Congaree Bluffs has a lot to explore in its 201 acres – and you can sit, stroll, or scramble. Since it is a bluff area overlooking the Congaree River [and Congaree National Park], you can visit the bluff hillsides or small ravines and scramble. There are also fairly level trails for strolling. Or you can simply sit in the picnic shelter or on the bluff and wait for critters to come to you. There are a variety of habitats, from flood plain to bluff to restored longleaf pine areas.

Congaree Bluffs is probably the best hawk watch area in the South Carolina Midlands, which isn't saying much. It can't compete with Hawk Mountain in Pennsylvania or even Caesar's Head for numbers of hawks. But if the weather is good, we should observe at least a few hawks. We had a few vultures but NO hawks in 2002. There is an observation platform and several other views over the floodplain. If you want to hawk watch, bring a chair. John Grego will join us after his Big Bird Hike in Congaree National Park to help with hawk identification and record keeping. He and his daughter Caroline have kept this hawk watch going for years. [She has now moved away.]

There is an education building and picnic shelter. We have the education building [and its restrooms] reserved. We will have lunch in the picnic shelter, which has plenty of space and tables and is, in fact, sheltered.

Gamecock Alert: USC will host Missouri that day. Kickoff is currently scheduled at 3:30. So keep the possibility of game traffic in mind if your return home takes you anywhere near the stadium.

GPS Alert: GPS have been known to confuse Congaree Bluffs and Congaree National Park. Stay on the WEST side of the Congaree River, and you should be OK.

Arriving from the south on Interstate 26. Take Exit 145 [US 601]. Go through St. Matthews, noting the House of Pizza as you pass by, until you get to SC 419 in about 9 miles. Turn left and drive approximately 3.5 miles to Turkey Trot Lane.

Arriving from the north on US 601. Cross the Congaree River. Take the first right [SC 80]. Drive 1.5 miles to SC 419 and turn right. Drive 2.2 miles to Turkey Trot Lane.

Arriving from the north on Interstate 26: You can simply go to Exit 145 as above. Exit 139 [SC 6] is a more direct route to St. Matthews. Just turn onto US 601 in St. Matthews and drive north to SC 419. The DNR website has more direct [and MUCH more complicated] directions.

You have reached Turkey Trot Lane! Drive on the reasonably well-maintained sand road until you reach the education building at the end. We will meet there at 10:30. If for any reason the gate has not been unlocked for us, we will meet at the far parking lot near the gate.

We will have dinner at the House of Pizza on US 601 in St. Matthews. Retrace your steps to US 601 and turn right to St. Matthews. The House of Pizza is slightly less than 7 miles from this intersection according to Google Maps. Address is 721 Harry C Raysor Drive, St. Matthews, SC [aka US 601]. Phone is (803) 655-7827. Menu is quite good, lacking only in BBQ.
